

Double Diamond Interwoven Grille

Crafted from woven solid brass strips, our Double Diamond Interwoven Grille offers a bold interpretation of traditional basket weave detailing. Designed for applications including cabinetry, radiator covers, entertainment units, and air conditioning covers, each panel is made to your required sizes and is available in our 10 signature grille finishes.

Grille thickness: 3.4mm (excluding mesh)

Air flow: Air flow refers to the amount of open area within a grille, which directly affects ventilation performance for heating and air conditioning systems.

- 13mm Diamond – 44% (excluding mesh)
- 19mm Diamond – 51% (excluding mesh)
- 25mm Diamond – 75% (excluding mesh)

Please note that the addition of mesh backing will significantly reduce the overall air flow of the grille, additionally decreasing the air flow by approximately 58–65%, depending on the mesh selected.

Diamond options

Available in three different diamond sizes.

Width (W)
13mm 1/2"
19mm 3/4"
25mm 1"

Wire options

Available in both plain and reeded wire styles with a 3mm wire width.

Plain wire

Reeded wire

Mesh options

Our Mesh is commonly used as a backing for many of our decorative grilles, adding subtle texture while helping to conceal behind the panel.

- Available cut to size
- Available in both Brass and Stainless Steel
- Finishes available on Brass material only
