

Finish Care and Cleaning Instructions

Thank you for purchasing a fine decorative product from Armac Martin. Our products are of the finest quality and will provide years of worry-free use with proper care and maintenance.

- Please do not use abrasive cleaners, ammoniated products, rubbing alcohol, detergents, astringents, bleach based cleaners, aggressive chemicals, abrasive cleaning pads, or harsh polishes on the product.

Care Of Finishes

Lacquered finishes

We recommend the occasional use of a soft cloth. Abrasive cleaning products should never be used as they will escalate the speed in which the lacquer breaks down.

Plated finishes (un-lacquered)

We recommend the occasional use of a soft cloth and the use of a quality metal polish will help preserve the finish.

Non plated finishes (Un-lacquered)

We recommend the occasional use of a soft cloth and the use of a quality metal polish will help preserve the finish if highly polished. Our antique un-lacquered finishes are designed to naturally oxidise overtime.

We recommend fitting is carried out by a suitably qualified tradesman

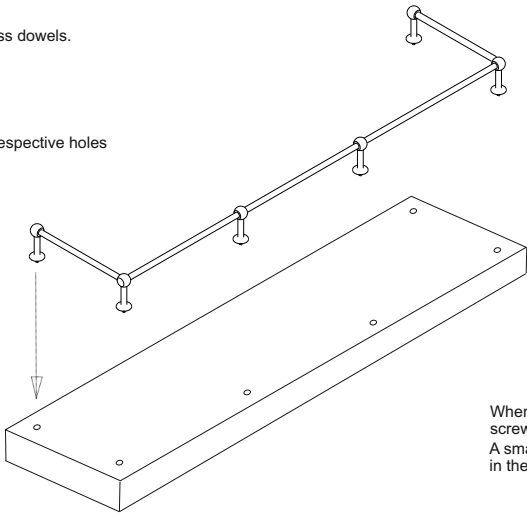

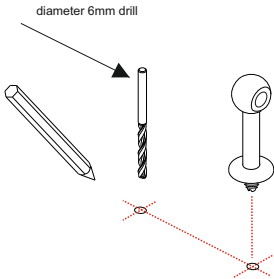

- Tools you will need
Appropriate safety equipment i.e safety glasses
Drill
Screwdriver
Tape Measure
Pencil

Step One – Mark out holes
Mark out holes to suit your gallery rail configuration

Step Two – Drill Holes
Use a diameter 6mm drill to drill the holes deep enough to take the brass dowels.

Step Three – Fit first end / corner post
We suggest you start from the left and fit your first end corner post

Step Four – assemble & fit
Loosely assemble the complete assembly and push the post in to the respective holes

When multiple bars are supplied
screw rails together using grub screw supplied
A small amount of adjustment is available
in the joints to ensure bars fit correctly
